

Sound - Horror Location RECCE

Date	22/01/2019
Location Details	The location that the short clip will be filmed in is St Catherine's Woods.
Scene/Purpose	The scene will take place here because the story revolves around a group of hikers getting stalked in the woods by an unknown creature.

Permissions	St catherine's Woods is a public area, therefore I will not need to ask permission to film here. Additionally, the area is quite large so i will not need to worry about coming across members of the public while recording.
Points of Interest	I am interested in filming here because it is the largest wooded area in Jersey. This means that it is further away from any buildings or roads and so it will be easier to edit sound due to the lack of people/cars.
Safety Issues	There is always the risk that someone might trip or slip and injure themselves but we will take precautions when filming to ensure that this does not happen.
Suitability/Shots	
Electric Supply	The batteries for the camera will be fully charged and we will be filming for a maximum of 3 hours every session so the battery will not be completely spent.
Sunlight	Since the scene will be recorded during the afternoon and in the woods there will be minimal sunlight which is required for the scene itself.

Windows	No windows.
Noise	We will be deep in the woods so there will be minimal noise from the public, however, there is a high chance of birds during filming as well as other animals.
